

Below is a provisional list of biotopes identified from the Carna Survey Forms. In most cases the form number corresponds to the biotope identified. However in some cases multiple forms from the same site were used to generate one or more biotopes and in these cases there is a blank space in the biotopes column. Following on from the list of Biotopes are copies of the original survey forms with surveyor names redacted. Any queries about these forms can be addressed to the report compiler , Owen Paisley via e-mail (seasearch.west@btopenworld.com).
